

**Item Name :** Chicken Adult Tissues Protein lysate, Universal

**Cat#** CHUL-4567

**Size:** 100 ug

**Species:** Chicken

**Tissue type** Chicken Normal Tissue, protein pools from multiple donors

**Donor Information:** Male: 8 month(s) old. Pool of 1 donor(s)  
Female: 8 month(s) old. Pool of 1 donor(s)

**Buffer:**

Total tissue protein lysate was prepared in Hepes buffer, pH 7.9, KCl, dexoycholate, NP-40%, EDTA, sucrose, and a cocktail of protease inhibitors. Lysate is typically supplied at a concentration of 2 mg/ml (or see lot specific conc. on the vial).

**Storage and stability:**

Store at 2-8°C for short term use. Long term storage at -70°C in suitable aliquots. Avoid repeated freeze thaw cycles. Under proper storage conditions the shelf life ~6 months from the date of receipt.

**Recommended Usage**

Western Blot (10 µg to 20 µg per lane is recommended for a mini gel). Immunoprecipitation, Electrophoresis, Enzymatic activity analysis, Protein-protein interaction, tissue specific expression.

All items are for in vitro research use only.

---
