

## Item Name Human Cell Line Array I

**Cat#** HCLA-17601

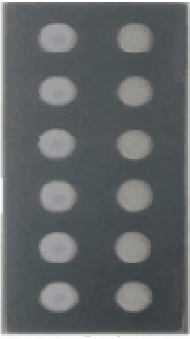

**Size:** 1 package of 5 slides

**Cell Lines** 293, A-431, A549, HeLa S3, Hep G2 and MCF7

**Source** Human

**Buffer:** In order to keep the antigens in their native forms, cells were fixed in 4% paraformaldehyde.

**Store** Can be stored for up to 3 months at 4°C under desiccated conditions.

<p style="text-align: center;"><b>Human Cell Array I</b></p>  <p><b>293</b></p> <p><b>A-431</b></p> <p><b>A549</b></p> <p><b>HeLa</b></p> <p><b>Hep G2</b></p> <p><b>MCF7</b></p>	<p><b>Recommended Usage</b></p> <p>This product is provided for immunocytochemical analysis of protein and protein-protein interaction.</p> <p><b>Cell Array preparation</b></p> <p>Human Cell Array I carries 6 different human cell lines, including 293, A-431, A549, HeLa S3, Hep G2 and MCF7. Cells are harvested at the log phase of growth. In order to keep the antigens in their native forms, cells were fixed in 4% paraformaldehyde. The cells were arrayed on a 12-well (5 mm) adhesive coated slide, with each well's surface specifically treated to enhance cellular attachment and to minimize background staining. Each well loaded with approximately <math>7.5 \times 10^3</math> cells. A follow-up heat dehydration process was done to ensure the attachment of cells and the stability of cellular proteins.</p> <p>All items are for in vitro research use only</p>
