

**Product Specification Sheet**

**Mouse Alpha 1 acid glycoprotein (A1AG) Protein**

**Cat. #** A1AG18-N-25

Mouse Alpha 1 acid glycoprotein (A1AG) Protein, pure

**SIZE:** 25 ug

A1AG serum protein, also called orosomucoid, is a monomer about 210 amino acid residues long; the amino acid sequence has been determined through 192 amino acids. A1AG is found in Cat plasma in concentrations of 55-140 mg per 100 ml. It is a classical standard glycoprotein (40 Kda, ~40% carbohydrates) for studies on the structure of the oligosaccharide units. Its biological significance is unknown, although it can bind progesterone 15 times as strongly as albumin. Sialic-acid-deficient alpha-1-AG has an affinity for vitamin B-12. Clinically, alpha 1 acid glycoprotein is an acute-phase reactant that together with haptoglobin is an indicator of acute inflammation. The alpha 1 acid glycoprotein:haptoglobin ratio is useful in studies of bone marrow disorders, hemolytic processes and metastases.

It is a positive acute phase reactant, the levels of which increase significantly in cats in response to inflammation, tissue injury and disease. A1AGP is purified using a combination of acid extraction, precipitation, gel filtration and affinity chromatography steps.

**Source of Antigen and Antibodies**

**A1AG** protein (**cat# A1AG18-N-25**) was purified (>95%, ~50 Kda) from Mouse plasma. Purified A1AG protein is formulated in 150mM Tris, pH 7.4, and 0.05% azide (see lot specific protein concn on the vial). Lyophilized protein should be dissolved in PBS at a desired protein concentration. Store liquid or lyophilized protein at -20oC in suitable size aliquots. Do not freeze and thaw.

**Storage**

**Short-term:** unopened, undiluted vials for less than a week at 4oC.

**Long-term:** at -20C or below in suitable aliquots after reconstitution. Do not freeze and thaw and store working, diluted solutions.

**Stability:** 6-12 months at -20oC or below.

**Shipping:** 4oC for solutions and room temp for lyophilized items.

Catalog#	ProdDescription
A1AG11-A	Anti-Cat Alpha 1-Acid Glycoprotein (A1-AGP) protein IgG, unlabeled
A1AG11-BT	Anti-Cat Alpha 1-Acid Glycoprotein (A1-AGP) protein IgG, Biotin conjugate
A1AG11-C	Cat Alpha 1-Acid Glycoprotein (A1-AGP) protein control for WB
A1AG11-HRP	Anti-Cat Alpha 1-Acid Glycoprotein (A1-AGP) protein IgG, HRP conjugate
A1AG19-N	Alpha 1 Acid Glycoprotein (A1-AGP), Cat Plasma
A1AG16-N-25	Alpha-1-Acid Glycoprotein Protein, Cat, purified
A1AG17-A	Anti-Dog Alpha-1-acid Glycoprotein IgG, aff pure
A1AG17-C	Alpha-1-Acid Glycoprotein Protein, Dog, control for western
A1AG17-N-25	Alpha-1-Acid Glycoprotein Protein, Dog, purified
A1AG18-A	Anti-Mouse a-1-Acid Glycoprotein IgG, aff pure
A1AG18-C	Alpha-1-Acid Glycoprotein Protein, Mouse, control for western
A1AG18-N-25	Alpha-1-Acid Glycoprotein Protein, Mouse, Purified
A1AG19-A	Anti-Rat a-1-Acid Glycoprotein IgG, aff pure
A1AG19-C	Alpha-1-Acid Glycoprotein Protein, Rat, purified control for western
A1AG19-N-25	Alpha-1-Acid Glycoprotein Protein, Rat, purified
