

Product Specification Sheet

Mouse Monoclonal Anti-Mouse/Human Glut-5

□ Cat. # GT54-M

Mouse monoclonal anti-Mouse Gllut-5 IgG

SIZE: 100 ul

Most mammalian cells transport glucose through a family of membrane proteins known as glucose transporters. Molecular cloning of these glucose transporters has identified a family of closely related genes that encodes at least 7 proteins (**Glut-1 to Glut-13**, Mol. Wt. 40-80 kDa) and Sodium glucose co-transporter-1 (SGLT-1, 662 amino acids; ~75 kDa). Individual member of this family have identical predicted secondary structures with 12 transmembrane domains. Both N and c-termini are predicted to be cytoplasmic. Most differences in sequence homology exist within the four hydrophilic domains that may play a role in tissue-specific targeting. Glut isoforms differ in their tissue expression, substrate specificity and kinetic characteristics.

Glut-5 (rat 502 aa; transports fructose in intestine and testis).
FUNCTION: Cytochalasin B-sensitive carrier. Seems to function primarily as a fructose transporter.
SUBCELLULAR LOCATION: Multi-pass membrane protein.
TISSUE SPECIFICITY: Expressed in small intestine, and at much lower levels in kidney, skeletal muscle, and adipose tissue.
SIMILARITY: Belongs to the major facilitator superfamily. Sugar transporter (TC 2.A.1.1) family. Glucose transporter subfamily
Protein name Solute carrier family 2, facilitated glucose transporter member 5 ; **Synonyms** Glucose transporter type 5, small intestine GLUT-5, Glut5, Fructose transporter ; **Gene name** Slc2a5

Source of Antigen and Antibodies

Antigen	Recombinant glut-5 protein
Ab Host/type	Mouse monoclonal, IgG1 Protein A/G pure (cat #GT54-M) supplied in PBS, ph 7.4 0.1% BSA, 15% glycerol and 0.05% azide in liquid or lyophilized in the same buffer
2-ab	Goat Anti-mouse IgG-HRP conjugate Cat # 40320 (AP, biotin, FITC conjugates also available)
-ve control IgG	Cat # 20008-1, Mouse (non-immune) Serum IgG, purified, suitable for ELISA, Western, IHC as -ve control

Isotype Controls

Catalog#	ProdDescription
20102-101	Mouse IgG1 isotype control, purified
20102-101-1	Mouse IgG1 isotype control, purified
20102-101-APC	Mouse IgG1-APC conjugate (isotype control)
20102-101-B	Mouse IgG1-Biotin conjugate (isotype control)
20102-101-F	Mouse IgG1-FITC conjugate (isotype control)
20102-101-FP	Mouse IgG1-FITC-PE conjugate (isotype control)
20102-101-HP	Mouse IgG1-HRP conjugate (isotype control)
20102-101-PC5	Mouse IgG1-PE-Cy5 conjugate (isotype control)
20102-101-PE	Mouse IgG1-PE conjugate (isotype control)

Form & Storage of Antibodies/Peptide Control

Affinity pure IgG

□ 100ul □ solution □ lyophilized powder

Reconstitute in 100 ul water.

Storage

Short-term: unopened, undiluted vials for less than a week at 4oC.

Long-term: at -20C or below in suitable aliquots after reconstitution. Do not freeze and thaw and store working, diluted solutions.

Stability: 6-12 months at -20oC or below.

Shipping: 4oC for solutions and room temp for powder.

Recommended Usage

Western Blotting (1:500-1:1000) ; incubate the antibody with the membrane overnight for better detection.
 Immunofluorescence; 1:100-1:500; formalin-fixed tissues.
 Immunohistochemistry (IHC) 1:100-1:300; citrate buffer antigen retrieval.

Antibody concentration must be optimized for each application under defined experimental conditions.

Specificity & Cross-reactivity

GT54-M antibody cross-reacts with human glut-5. Other species not tested. We also supply other polyclonal antibodies made to the mouse, rat, and human glut-5 (see the web site for a complete listing).
