ALPHA DIAGNOSTIC INTERNATIONAL

Item Name 3T3 BALB Cell Slide

Cat# MCLS-17201

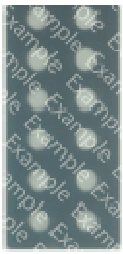

Size: 1 package of 5 slides

Cell Lines Fibroblast from 14- to 17-day-old BALB/c mouse embryos

Source Mouse

Buffer: In order to keep the antigens in their native forms, cells were fixed in 4% paraformaldehyde.

Store Can be stored for up to 3 months at 4℃ under desiccate conditions.

Recommended Usage

This product is provided for immunocytochemical analysis of protein and protein-protein interaction.

Cell Slide preparation

Mouse Balb/3T3 clone A31 cells were cultured in DMEM with 4 mM L-glutamine and harvested at the log phase of growth. The BALB/3T3 cells were fixed in 4% paraformaldehyde and arrayed on a 12-well (5 mm) adhesive coated slide, with each well's surface specifically treated to enhance cellular attachment and to minimize background staining. Each well was loaded with approximately 7.5 x 103 BALB/3T3 cells. A follow-up heat dehydration process was done to ensure the attachment of BALB/3T3 cells and the stability of cellular proteins.

All items are for in vitro research use only
