ALPHA DIAGNOSTIC INTERNATIONAL

Item Name : Mouse Normal Tissue: Kidney Whole Cell Lysate

Cat# MNK-50 and MNK-100

Size: 50 or 100 ug

Tissue type Kidney

Source Mouse

Buffer: HEPES (pH7.9), KCl, Sucrose, Sodium deoxycholate, and NP-40

Store For extended storage, freeze working aliquots at -70°C. Repeated freezing and thawing is not recommended. Under proper storage conditions the shelf life is half a year from the date of receipt.

Concentration Lysate is supplied at a concentration of 5.0 ug/ul.

All items are for in vitro research use only.

Recommended Usage

Lysates are prepared as positive controls for separation by SDS-PAGE and subsequent western blot analysis. Add 2X Laemmli buffer at 1:1 ratio of sample or higher concentrate of Laemmli buffer at appropriate ratio. Heat lysates for 5-10 minutes prior to loading unless otherwise specified on the antibody datasheet. Protein lysate can be validated by Western Blot using specific biomarker: GAPDH for total protein, cytoplasmic and universal total protein; Histone for nuclear protein; Na/K ATPase for membrane protein; or Vimentin for cytoskeleton protein
